

ABOUT ARGUS-I

An Advanced Facial Recognition Security Solution

Designed for both private and commercial use, the system is fully compliant with the Protection of Personal Information Act (POPIA) and provides actionable security intelligence while upholding stringent data privacy standards.

Proactive Crime Prevention

ARGUS-i integrates with official government databases to enable real-time identification of persons of interest. Security teams receive instant alerts when flagged individuals are detected - supporting proactive and preventative responses to potential threats.

Personalised Visitor Experience

The solution can also be applied to enhance the visitor experience by identifying individuals with preloaded profiles. This allows for personalised interactions based on stored preferences and information - improving overall service quality.

FEATURES

Advanced 3D/2D Facial Recognition

- Accurately identifies individuals across various lighting and angle conditions.

Real-Time SAPS Database Integration

- Matches faces against live government watchlists, including most-wanted and persons of interest.

Instant Alerts for Flagged Individuals

- Sends immediate notifications when a person of interest is detected.

24/7 Security Operations Centre (SOC)

- Continuous alert monitoring with human oversight for rapid response.

Personalised Visitor Experience

- Recognises returning visitors with preloaded details and preferences for a smoother, more welcoming experience.

People Counting & Analytics

- Tracks foot traffic to support crowd control, capacity planning, and business insights.

POPIA Compliance

- Fully aligned with South Africa's data privacy regulations for ethical and legal use.

Commercial & Private Sector Ready

- Ideal for use in offices, retail, industrial sites, residential estates, and public venues.

BENEFITS

- 01. Proactive Crime Prevention**
Identifies high-risk individuals before they enter or act.
- 02. Faster Law Enforcement Response**
Real-time alerts to the 24/7 Security Operations Centre (SOC) enable swift coordination with authorities, ensuring a rapid response.
- 03. Operational Efficiency**
Reduces the need for constant manual monitoring.
- 04. Cost Efficient**
Leverages existing CCTV infrastructure, eliminating the need for costly hardware upgrades.
- 05. Positive Visitor Experience**
Enhances the visitor experience with personalised entry powered by facial recognition and preloaded preferences.
